---

Thanks, Meghan. I have a question in to Dan on what he thinks is the best way to do this, but we'll make sure Dow gets the comments by tomorrow.

Hello RD,

Faruque has completed his review of the wind tunnel study that Dow is proposing to use to add nozzles to the Enlist label under the pending DRT program. Can you please convey these comments to Dow? They requested input no later than February 7<sup>th</sup>.

Please let me/Faruque know if you have any question.

Thank you!

Meghan

Meghan,

Please send the attached version to RD. Thanks. Faruque
